A virtuosic keyboard library based on a long string of sampling sessions with a live concert band and acoustic pianos, this is a versatile and beefy, professional-sounding library of jazz, blues and R&B keyboard performances. The dynamic sounds are instantly recognisable, and the samples are sure to stand out against the din. The library includes all the percussion instruments and most of the keyboard instruments from saxophone, flute, brass, keyboards, trombone, drums, tpt, tenor sax, baritone, and even clarinets and violins. With the help of the included keyboard sampler, you can match the exact sound quality of any instrument in the library to perfectly match your own synth or drum kit. Kontakt 5.4.2 is required, and there is a comprehensive guide to creating your own Arp 2 instrument patches. The library offers great value for money, a wide variety of keyswitches and articulations, a huge choice of notes, a varied selection of velocity layers, and a sturdy, professional feel that will appeal to both semi-pro and advanced users. Kontakt 5.4.2 can be used with all major samplers, and the digital version of the physical package includes a full Kontakt 5.4.2 tutorial. This is one of the best string sampler libraries on the market. Numbering around 80,000, this impressive library offers a wide selection of big-band brass (trumpet, trombone, cornet, and French horn), along with highly realistic piano, acoustic guitar and bass. The included patches are of a high quality, creating a cinematic and authentic feeling. Although the patches are of the highest quality, however, you can tweak their sounds using expert sets of instrument parameters. Although there are a variety of keyswitches and articulations, the library offers a highly user-friendly environment. This is a comprehensive, professionally-sounding big-band brass and piano library offering extended articulations.
