What's New in the Search Engine Creator For PHP?

Search Engine Creator is a PHP Web application that create simple search engine for any PHP web site. It will crawl a web site and index all the pages it finds. All the pages will be added to a database and the database will create the needed php files on the web server. All the search engine needed files will be placed in directory "search_engine". You can place the files on the server or you can just FTP them to your web site. In registered verion the results will not display any adverts or other unwanted content. Soccer Bar Chart & Soccer Team Standings Screensaver is your answer to the question "How to take a screenshot of a soccer bar chart or a soccer team standings screen?" You can create your own custom screensaver from the chart, then use it on your desktop or website. It comes with a soccer ball (which you can replace with your logo), and a small soccer field with a scoreboard. Just set a starting time and a desired end time to record the game. The software will record every game on the field, and print you a soccer score report. No matter how many goals are scored in the game, the software will print a report with all the stats. Social Calendar is a cross-platform social tool that lets you keep track of people, events and dates easily. It lets you see who is online, who is offline and when you are all invited. It also allows you to send messages, files and invitations. Besides that you can also comment and rate and event. You can also invite people to events in your calendar. Virtual Pager is an alternative to web-based pagers such as AOL Instant Messenger, Yahoo Pager and SpamAssassin. It has a graphical user interface and supports most of the IRC commands. It uses its own scripting language and Perl compatible API. Its main features are user subscription, notifications and multilingual. Exact Replica of the original NWN engine. While based on original NWN engine, it has new features and higher quality graphics. Only original NWN graphics and sounds are used. Remind Me, Remind Me, Remind Me, Remind Me, Remind Me, Remind Me, Remind Me is an app that lets you give your friends, co-workers and loved ones a little reminder that they have a birthday coming up.
